TRADELYTIX
**SMART INTELLIGENCE FOR
TRADE SURVEILLANCE**

TRADELYTIX

Tradelytix is a sophisticated platform to manage compliance functions and surveillance of trade activities conducted by market participants.

Market manipulators are increasingly adept at using technology to orchestrate large scale manipulation. As such, compliance and regulatory bodies need to utilise **efficient detection algorithms** to stay ahead in this arms race.

FEATURES

- Red-Flag Detection
- Collusion Detection
- Multi-Counter Analysis
- Single-Counter Analysis
- Visualisation and Reporting

Tradelytix aims to combine machine-learning detection algorithms with advance analytics tools.

The goal is to provide a holistic platform to enhance your surveillance capabilities.

Our detection and analytics tools are built with flexibility in mind. We understand that manipulation patterns evolve constantly, hence, our Red-Flag and Collusion Detection features are designed to adapt to these changes.

Complimenting our cutting-edge detection algorithms is our Visualisation and Reporting feature. It is equipped with comprehensive graphical and statistical reporting tools to piece together a coherent picture.

We harness the power of big data analytics to identify suspicious trading patterns across multiple counters with our built-in Single- and Multi-Counter Analysis features.
